Subject: Friday

Hi Jeremy,

Thanks for the offer to talk with me about the uniform rate approach. I know I said we could talk on Friday, but the more I think about it, this isn't something that I'll be able to provide feedback to our EPA group on tomorrow anyway and I think this conversation can wait until Monday.

I am free on Monday for most of the day except for 1pm-2pm. I'd like to reschedule our talk to Monday. Let me know when you are all available.

In terms of topics, I need to focus on the things that I can control. Right now, I am writing preamble language for the state measures approach. I'd like to specify the types of information a state would need to submit when they are demonstrating the EE/RE and other measures that are only state enforceable will be equal to the emission standards we set. Any thoughts on those key assumptions would be most helpful.

I'm still reviewing the AVERT EIC paper. I'm doing some heavy editing so I won't have something for you to react to until next week.

Best,

Robyn (Kenney) DeYoung
